Reasons for Allowance

The following is an examiner's statement of reasons for allowance:

The closest prior art is Farrell (US 4,526,823) in view of Miyazaki (US 4,578,296).

Farrell teaches a plastic laminate sheet that comprises an outer layer of filled-plastic, an inner layer of HDPE (herein relied upon to read on the claimed "sealing layer"), and an ethylene vinyl alcohol (EVOH) barrier layer (col 4, lines 43-44) interposed between the inner and outer layers (abstract). The layers are adhesively laminated together. Miyazaki teaches a thermoformed laminate comprising a filled polyolefin resin composing and an unfilled layer(s) (abstract and col 7, lines 33+) wherein the thickness ratio of the filled layer to unfilled layer is preferably 98:2 to 70:30 in order to assure that the laminate maintains the appearance of paper (col 8, lines 5+).

The references fail to render obvious the claimed invention because they fail to teach printing and pre-treating the film prior to adhesive lamination. Furthermore, the references fail to render obvious the use of the plastic laminate sheet in the package of claim 15.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
